INSTALLATION CERTIFICATE CF-6R-MECH-26-HERS											
Refrigerant Charge Verification - Alternate Measurement Procedure											
Site Address:					<b>Enforcement Agency:</b>		Permit Number:				
As many as 4 systems in the dwelling can be documented for compliance using this form. Attach an additional form(s) for any additional systems in the dwelling as applicable.											
	Temperature Measurement Access Holes (TMAH) and Saturation Temperature Measurement Sensors (STMS)  Procedures for installing TMAH are specified in Reference Residential Appendix RA3.2. If refrigerant charge verification										
is required for compliance, TMAH are also required for compliance. STMS are only required for completely new or replacement space-conditioning systems that utilize prescriptive compliance method.											
TMAH - Access Holes in Supply and Return Plenums of Air Handler

Refrigerant Charge Verification - Alterna	te Measur	ement	Procedure		(Page 2 of 2)							
Site Address:		<b>Enforcement Agency:</b>		Permit	Permit Number:							
Alternate Charge Measurement Procedure (for use if outdoor air dry-bulb is below 55 °F)  Procedures for Determining Refrigerant Charge using the Alternate Method are available in Reference Residential Appendix RA3.2. As many as 4 systems in the dwelling can be documented for compliance using this form. Attach an additional form(s) for any additional systems in the dwelling as applicable.  • The alternative charge measurement procedure requires that the system shall be installed and charged in accordance with the manufacturer's specifications for refrigerant charge using the weigh-in charging method.  • Installer verification of line lengths and charge adjustment calculation must be documented on CF-6R before starting this procedure.  • If outdoor air dry-bulb is 55 °F or above, installer must use the Standard Charge Measure Procedure.												
Weigh-In Charging Method for Refrigerant Charge Verification												
System Name or Identification/Tag												
System Location or Area Served												
Actual liquid line length (ft)												
Manufacturer's Standard liquid line length (ft)												
Calculate: difference in length (ft) = Actual length – Standard length												
Manufacturer's correction factor												
(ounces per foot)  Calculate: charge adjustment												
= correction factor X difference in length												
Alternate Charge Measurement Summary:												
System refrigerant charge has been adjusted to												
meet the manufacturer's specifications based on												
actual line length Enter Pass or Fail												
DECLARATION STATEMENT	C.I. G	G 116										
I certify under penalty of perjury, under the laws of			-									
• I am eligible under Division 3 of the Business and Professions Code to accept responsibility for construction, or an authorized representative of the person responsible for construction (responsible person).												
• I certify that the installed features, materials, components, or manufactured devices identified on this certificate (the installation) conforms to all applicable codes and regulations, and the installation is consistent with the plans and specifications approved by the enforcement agency.												
<ul> <li>I understand that a HERS rater will check the installation to verify compliance, and that that if such checking identifies defects, I am required to take corrective action at my expense. I understand that Energy Commission and HERS provider representatives will also perform quality assurance checking of installations, including those approved as part of a sample group but not checked by a HERS rater, and if those installations fail to meet the requirements of such quality assurance checking, the required corrective action and additional checking/testing of other installations in that HERS sample group will be performed at my expense.</li> <li>I reviewed a copy of the Certificate of Compliance (CF-1R) form approved by the enforcement agency that identifies the specific requirements for the installation. I certify that the requirements detailed on the CF-1R that apply to the installation have been met.</li> <li>I will ensure that a completed, signed copy of this Installation Certificate shall be posted, or made available with the building</li> </ul>												
permit(s) issued for the building, and made available to the enforcement agency for all applicable inspections. I understand that a signed copy of this Installation Certificate is required to be included with the documentation the builder provides to the building owner at occupancy. I will ensure that all Installation Certificates will come from a HERS provider data registry for multiple orientation alternatives, and beginning October 1, 2010, for all low-rise residential buildings.
